

Project Case Study

Project: Supplied to and Installed by Contain Distributor **Whitaker Water Tanks**

Location: Dripping Springs, Texas

Application: CGSR Model 1502 Rainwater Collection Tank.

System: Contain CGSR Model 1502 - 9,592 Gallons Including: Complete Rainwater Harvesting Tank Kit.

Contain Water Systems Inc. supplied to Contain Distributor **Whitaker Water Tanks** a model 1502 Contain CGSR Rain Harvesting Storage Tank whom installed it on a rural residential property without city water availability. This system has a pre filtration system located in the adjacent garage.

This application Includes: 3: 2" Westeel Bulkhead Assemblies with valves for irrigation supply, optional backup supply inlet and additional outlet, 16" inlet basket with filter strainer, side roof inspection hatch, roof ladder and 6" overflow.

This is another application that is making excellent use of a renewable resource that otherwise would have been runoff on this property.

- Contain CGSR Model 1502 - 9,592 Gallons
