

Water Containment for Fire Protection

OUR ENGINEERING STANDARDS EXCEED REQUIREMENTS FOR:

**NFPA-22
NSF 61 / ANSI
AWWA D103-09
UBC, NBC AND IBC**

Our manufacturing is governed in an ISO-9001-2008 certified facility.

Each tank is engineered to exacting specification meeting site specific local codes, compliances, seismic conditions and water usage requirements.

**Unbeatable 20-year warranty
for every tank we sell**

**Tanks and liners made in-house
in our Central Texas facility**

**Our 8-layer EnviroClean™
tank liners come with an unbeatable
leak-free warranty**

**Our stellar customer service
team will ensure you get the right
product, delivered on-time,
custom-made for your needs.**

Classic, Versatile, High-Quality

When the threat of fire looms, confidence in your water supply and containment system is critical. That's why you need the hand-crafted quality of Contain Water Systems tanks for your fire suppression needs.

QUICK, CONVENIENT AND ECONOMICAL

- Contain's proximity to the Port of Houston and Texas border ports ensures the best lead times and prices in the industry.
- Our corrugated tanks are easily erected and assembled in the field without the need for heavy equipment.
- Specialized packaging systems ensure our products can easily be trucked in, tractor carried or even dropped by helicopter where necessary.

ONE TANK, MULTIPLE PURPOSES

Our tanks are perfect for fire suppression water storage, but can double as storage for potable water, wastewater, irrigation, mining and agriculture water storage needs.

We offer several roof styles, including 30-degree, 10-degree, 4-degree, flat and inverted roofs, as well as an option for powder coating.

252 Frog Pond Lane, Building C
