

Project Case Study

Project: Christ Our King Anglican Church

Distributor: Loomis Tank Centers

Location: New Braunfels, Texas

Application: Contain CGS Model 2702 Well Water Storage Tank.

System: Contain CGS Model 2702 - 31,078 Gallons each including: 2" Bulkhead Assembly, 2" Ball Valve, 4" Bulkhead Assembly, 4" Overflow, Roof Ladder and Side Roof Inspection Hatch. Installed on compacted Sand Pad

Contain Water Systems Inc. works hard to stay on the leading edge of industry standards and compliments itself on providing start to finish customer service on each and every CGS Water Tank Project.

Seen in this project profile is a Contain CGS Model 2702 Water Storage Tank. This well water storage tank was installed on a level and compacted sand pad. This tank has a 2" inlet for the well water and a 4" outlet to supply the needs of the church. This project holds a total storage capacity of 31,078 US Gallons.

This Contain CGS 2702 Water Storage Tank is another great example of a great looking alternative to storing one of nature's most precious resources.
