

## Project Case Study

**Project:** Home Depot  
Garden Centers

**Location:** State Of Florida

**Application:** 25 Condensate  
Collection Tanks

**System:** Contain CGS  
Water Tank  
Model 606 - 4,604 Gallons  
including: Inspection Hatch,  
Platform, Water Pump  
System and a Pre Filtration  
System.

**Contain Water Systems Inc.** supplied 25 CGS Water Tank systems to Home Depot for the collection of condensate from the air conditioning units in the Garden Centers. The Model 606 Contain CGS Water Storage Tank was designed to meet 165 MPH Wind Conditions and to collect the condensate to supply the water for irrigation within the garden centers. The Home Depot expects to save over 800,000 gallons in each location eliminating the use of fresh water and capturing the wasted condensate that otherwise would be lost. Expected savings \$19,500 per year / per site.

### State Of Florida Home Depot Condensate Collection Tank Projects

- Contain CGS Model 606
- Durable 30 Mil Black PVC Liner
- Inspection Hatch & Manway
- 2" Outlet Kit
- 4" Inlet Kit
- Pre Filtration System
- Pump System

Relationships...Strong as **Steel**
